PROFESSIONAL SUMMARY

Frontend Developer with 7+ years of experience creating scalable, high-performance applications and integrating complex web ecosystems. Expert in Angular and TypeScript with a track record of modernizing core banking systems and delivering high-impact, WCAG-compliant financial platforms. Passionate about clean architecture, reusable component design, and agile collaboration across product and engineering teams.

EMPLOYMENT HISTORY

Lead Frontend Developer – unyx.ai
06.2026 – Present

- Frontend Leadership: Leading the front-end architecture and development strategy, establishing best practices in scalable component design and code quality by using the latest ai tooling.
- Technical Strategy: Driving cross-functional initiatives to ensure high-performance, accessible, and maintainable user interfaces using angular v22.

Senior Frontend Developer and AI Validator – micro1
06.2026 – 10.2026

- Technical Validation: Evaluating and validating AI-generated code and technical solutions, with a strong focus on advanced frontend technologies (Angular, react, TypeScript).
- Quality Assurance: Ensuring AI outputs meet strict industry standards for performance, security, and architectural best practices before deployment.

Senior Frontend Developer – Outtask
02.2026 – 07.2026

- Project – ABN AMRO Bank: Frontend development at ABN AMRO for the ideal|wero team using Vue.js, with end-to-end test coverage via Playwright and cloud infrastructure on Azure.

Senior Front-End Developer – Bank Hapoalim
2019 – 10.2025

- Cross-Functional Collaboration: Partnered with backend and DevOps teams to modernize core banking systems using Angular, TypeScript, and REST APIs.
- Modernization & Performance: Led migration from legacy AngularJS to Angular 19, leveraging RxJS and Nx for improved scalability.
- UI/UX & Accessibility: Translated Figma prototypes into reusable design tokens and WCAG-compliant components.
- Business Impact: Delivered a mobile-first public loan platform achieving 86% mobile adoption and $1M in new loans within 4 months.
- Testing & Quality: Implemented Jest unit tests across key modules.

SKILLS

Frontend:
Angular (v22), TypeScript, Vue.JS, RxJS, NgRx, Jest, SCSS, HTML, CSS, ES6+, Figma, Storybook, React, Web APIs

Architecture:
Nx Monorepos, Microfrontends, REST APIs, Modular Design, CI/CD, Observables, Azure DevOps, AWS basics

Testing:
Jest, vite, Playwright, Unit & Integration Testing

Tooling:
Codex, Claude, npm, Yarn, WebPack, Bitbucket, Git.

Backend:
NodeJS, Express.js, MongoDB, Java

Accessibility:
WCAG 2.1 AA, ARIA

Methodologies:
Agile/Scrum, TDD

EDUCATION

Full Stack Development Certificate
Coding Academy
Comprehensive training in full-stack JavaScript development (Angular, React, Vue.js, Node.js, and REST APIs).
